Building Autonomous Websites with Agentic AI & Modern Dev Tools

GIT github.com/codewithlaiba28 **IN** linkedin.com/in/laiba-khan-2a4b63335

ABOUT ME

Passionate AI & Web Developer from Karachi with hands-on expertise in modern web technologies and cutting-edge Agentic AI. Currently pursuing BSCS at Virtual University while building autonomous web applications using Claude CLI, Qwen CLI, and AI agent frameworks. Certified in Prompt Engineering, MCP, and Agentic AI Levels 1 & 2.

TECHNICAL SKILLS

Frontend:

HTML5 CSS3 JavaScript React.js Next.js Tailwind CSS

Backend/AI:

Python OpenAI Agent SDK n8n Agentic AI

Specialty:

Autonomous Websites Prompt Engineering Vibe Coding MCP

PROJECTS & EXPERIENCE

● Autonomous Website Builder

Builds complete full-stack websites from specs using Claude CLI & Qwen CLI. Entire apps generated end-to-end via AI spec-driven workflow with zero manual coding.

● Agentic AI Applications

Developed AI agents using OpenAI Agent SDK and MCP framework. Specialized in Level 1 & 2 agentic workflows with tool-use, memory, and multi-step reasoning.

● n8n Workflow Automation

Designed and deployed complex automation pipelines using n8n, integrating REST APIs, AI models, and third-party services for full end-to-end automation.

● Next.js Full-Stack Projects

Built and deployed production-ready Next.js apps with React and Tailwind CSS — modern UI/UX optimized for performance and responsiveness.
